

Electric Vehicle Information Exchange (EVIX)

The Electric Vehicle Information Exchange promotes cross-industry collaboration and information sharing in partnership with automotive manufacturers, charging equipment companies, electric utilities and governments. EVIX consolidates, validates and analyzes dispersed data sets to provide a holistic picture of electric vehicle adoption market by market.

EVIX provides relevant, detailed industry analysis to better inform key stakeholders as they bring vehicles to market, develop relevant incentives, deploy public charging, and ensure safe and uninterrupted electric service.

EVIX provides:

- **Data Consolidation:** Creating a robust data warehouse through industry outreach, license and permissions management, and data integration
- **Secure Sharing:** Secure, purpose-built online delivery portal, ensuring only approved recipients have access to sensitive industry information
- **Trending Analysis:** Sales penetration, pipeline forecasting and owner behavior analysis for smarter industry planning
- **Market Profiling:** Market-level consumer segmentation and propensity profiling to help industry stakeholders better understand the EV customer
- **Consumer Response:** Independent, cross-manufacturer consumer survey panel to capture changing consumer EV sentiment

Oceanus

We analyze. We reframe. We innovate.

Oceanus is an enterprise solutions firm with the agility of a startup and the expertise of an industry veteran. Our process is rooted in uncovering actionable data intelligence and rapidly implementing the right technology solution to move our customers' businesses forward. We thrive on finding answers to the most difficult challenges facing the automotive, technology and energy industries. From data intelligence, to product strategy, to enterprise implementation, Oceanus delivers on all aspects of a technology solution.
