

The Electric Vehicle Finder

The EV Finder brings together relevant information about electric vehicles so that consumers don't have to work so hard to learn about the benefits of EV ownership. The EV Finder allows consumers to search by ZIP code for details about local EV incentives, utility programs and rates, industry organizations, and vehicles available for purchase. This online application can be integrated seamlessly into any website.

SHOW CONSUMERS THE BENEFITS OF OWNING AN EV

- Easy Search by ZIP
- Accurate, Complete Info
- Detailed Contact Information
- Customizable Listings

The EV Finder has nationwide coverage of relevant EV ownership details at the zip code level. Utility service area and contact information is automatically populated, but individual utilities can customize their information with more specific geographic data and program details free of charge. Incentives are validated and updated regularly. Consumers can submit additional or updated information for their area.

The EV Finder shows consumers:

- **Electric Utility EV Information:** Details about special rates, rebate offers and pilot program information
- **Incentives:** Complete, local listings of monetary and non-monetary consumer benefits with procurement details
- **Organizations:** EV-related consumer organizations with membership information
- **Vehicles Available for Purchase:** EV Make and Model availability by market

Oceanus

We analyze. We reframe. We innovate.

Oceanus is an enterprise solutions firm with the agility of a startup and the expertise of an industry veteran. Our process is rooted in uncovering actionable data intelligence and rapidly implementing the right technology solution to move our customers' businesses forward. We thrive on finding answers to the most difficult challenges facing the automotive, technology and energy industries. From data intelligence, to product strategy, to enterprise implementation, Oceanus delivers on all aspects of a technology solution.
